## MCA-Soft Product Updates

Issue 6 March 2015

### **NEW! SIS® HAS GONE MOBILE**

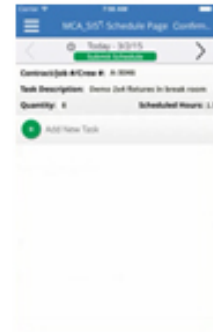

MCA, Inc. has been hard at work developing a NEW process for data entry out in the field. That's right; a complete mobile app designed specifically for filling out your SIS® form and automatically uploading them straight from the jobsite right from your iPad or iPhone.

- No more hand written forms that are sometimes hard to read.
- No more typing out spreadsheets!
- View real-time Pareto Charts from your SIS® anytime, anyplace.
- No internet connectivity, no problem! The NEW SIS® App will automatically upload your data whenever and wherever wireless internet is accessible.

Plan your day, your tomorrow and the next day all from the convenience of one mobile device.

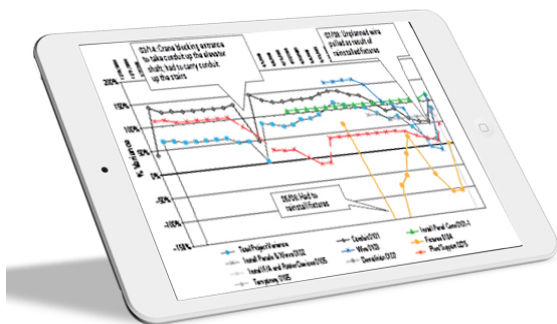

Contract/Job/Crew #	Task	Quantity	Scheduled Hours
A-3046	Demo 2x4 fixtures in break room	8	1.5
Contract/Job/Crew #	Task Description	Quantity	Scheduled Hours

**NEW to JPAC®**

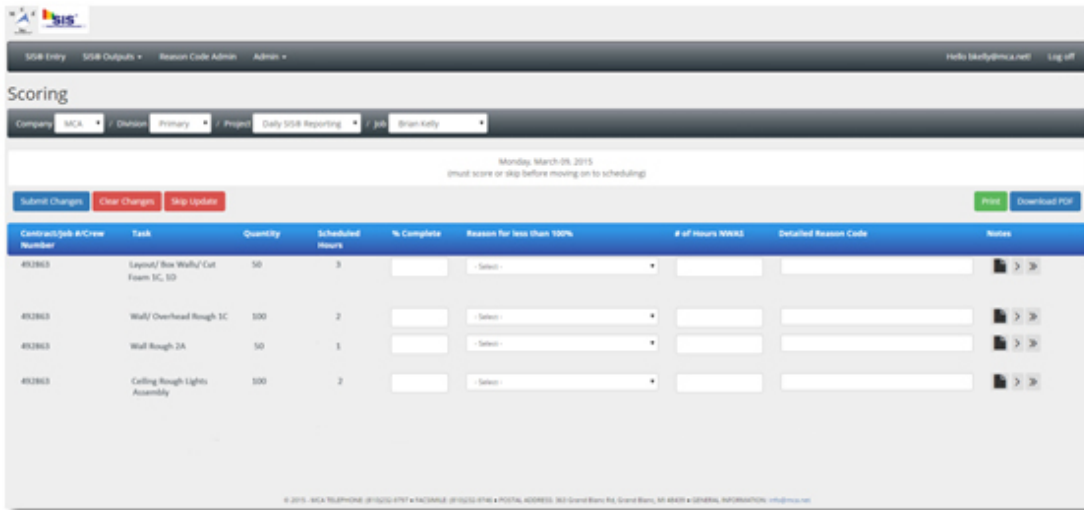

Not only have we made our SIS® app mobile friendly we also made our JPAC® charts viewable, pan-able and zoom-able on your iPad and iPhone as well.

We are planning to demo our NEW SIS® app as well as the JPAC® zooming features at our Spring Symposium in April, so remember to bring your iPads and iPhones for a hand on experience. Hope to see you then!

**ALSO NEW? SIS® 4.0 Web Application**

A new version of SIS® will be released to MCA Clients starting April 1st, 2015. This version features a whole new "look and feel" consistent with the JPAC® 4.X versions. Foreman and electricians will now be able to enter their own scheduling and recording directly into SIS®. Foreman will be able to schedule for their crews and crew members will then be able to record their obstacles accordingly at the end of the day. You're able to change your reason codes anytime and all the time; no such thing as a discrete event. Additionally, users will still have the ability to print their forms or save them as a PDF.

Contact us with any questions [click here](#).

Sincerely,

The MCA, Inc. Team
